Register a Model Service Provider Account

Register a Model Service Provider Account

1. Course Content
2. Alibaba Cloud Bailian Platform Account
   2.1 Alibaba Cloud Bailian International Site
3. OpenRouter Platform Account
   3.1 Register an Account
   3.2 Create an API

1. Course Content

- Register an account and API-KEY of a model service provider with your own email or phone number to obtain access to cloud models.

> **Tip**
>
> - This tutorial is for users registering a model service platform account for the first time. If you already have accounts with some model providers, you can skip this lesson.
> - This lesson takes registering accounts for the Alibaba Cloud Bailian and OpenRouter platforms as examples for demonstration. The registration method for other platforms such as Zhipu, DeepSeek, and OpenAI is similar, and you can refer to the corresponding official websites to register.

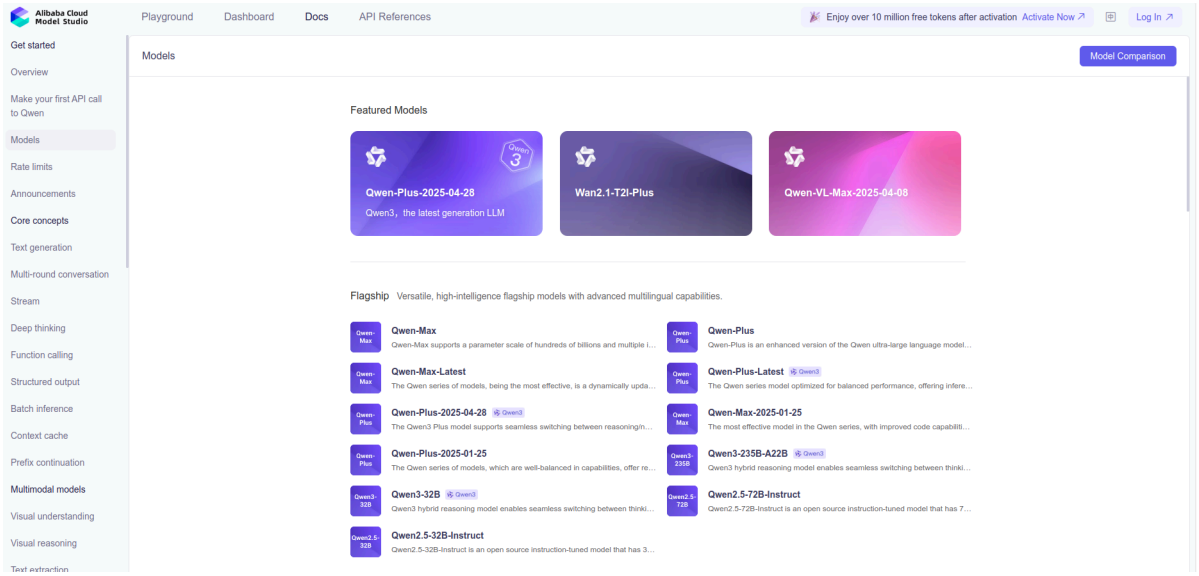

2. Alibaba Cloud Bailian Platform Account

The Alibaba Cloud Bailian large model distinguishes between the international site and the domestic site. Users in mainland China need to register with a mainland phone number; international users should go to the international site of the Bailian large model to register.

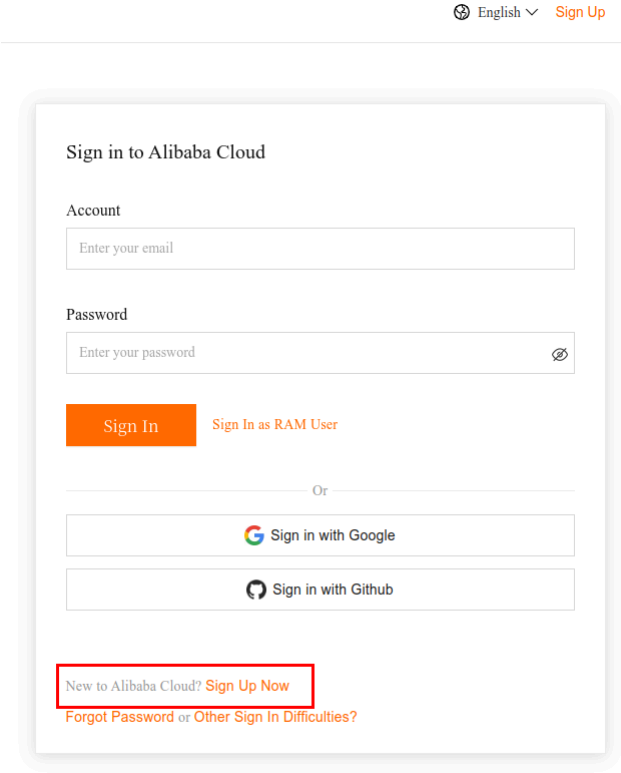

2.1 Alibaba Cloud Bailian International Site

International site address: https://bailian.console.alibabacloud.com/?tab=doc#/doc/?type=model&url=https%3A%2F%2Fwww.alibabacloud.com%2Fhelp%2Fen%2Fdoc-detail%2F2840914.html&renderType=component

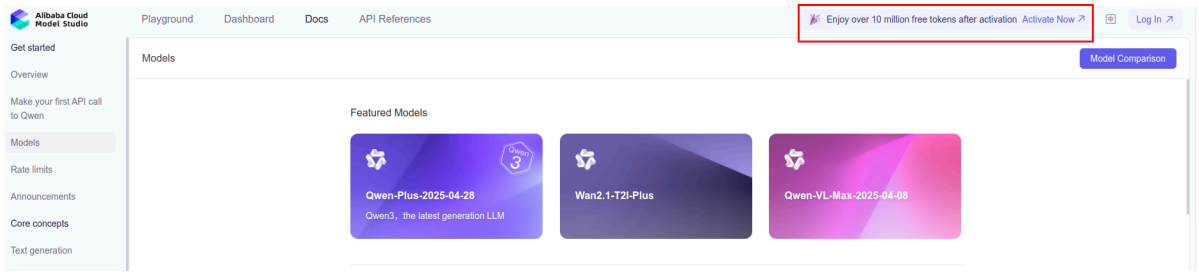

- Click `Log in` to register an account.

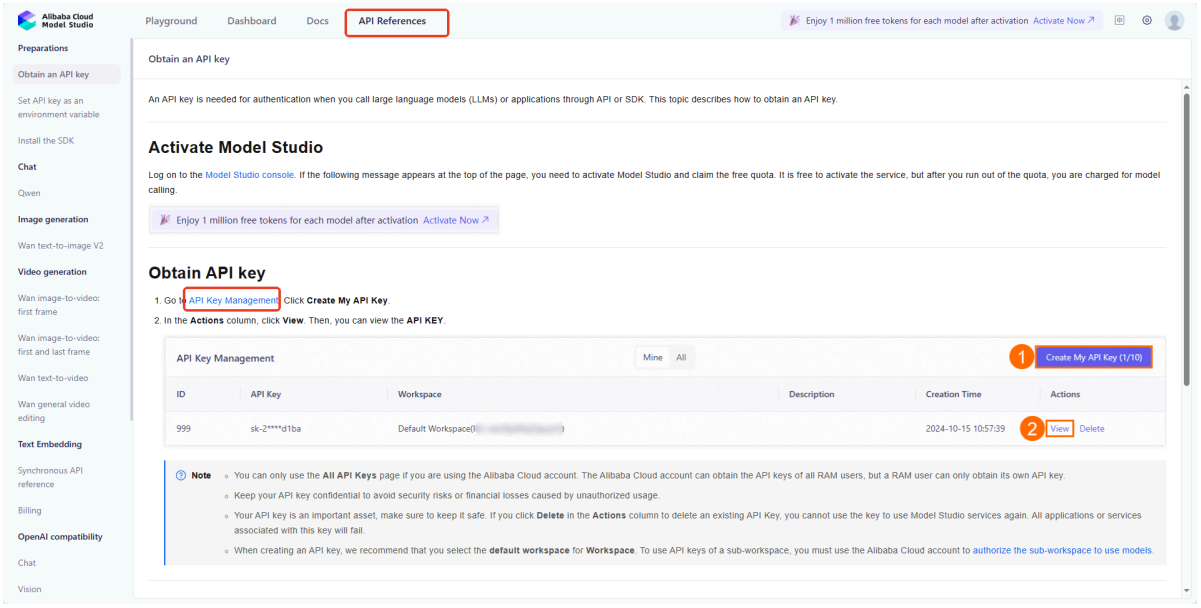

- Select an individual Account to register.

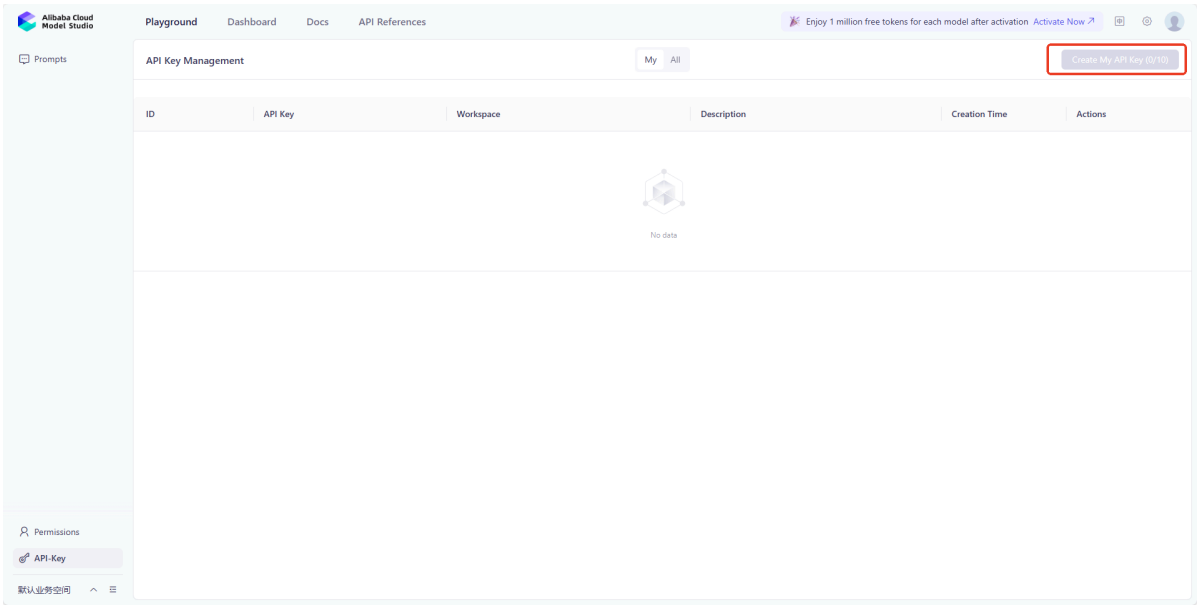

- Return to the home page and click to claim the free quota.

- Then click API Management and create an API-KEY.

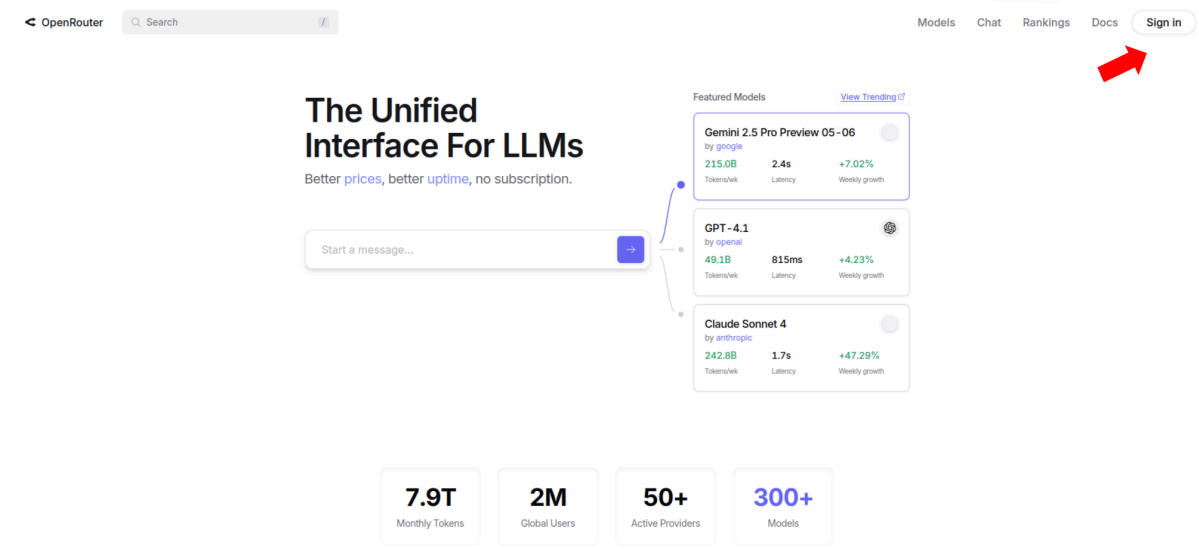

3. OpenRouter Platform Account

> **Note**
>
> - OpenRouter provides many free model services, but there is an access frequency limit and the comprehension ability of free models varies greatly. To ensure a good experience, it is recommended to prioritize the model services of Alibaba Cloud Bailian. This part is for reference only for users who need to use OpenRouter services.

3.1 Register an Account

Open the OpenRouter link, click the avatar in the upper right corner to register an account, and complete the registration with an email. The process is similar to the above and will not be repeated here.

3.2 Create an API

- Click Keys in the upper right corner to create an API.
