Map Description and Props Placement

Map Description and Props Placement

1. Map Overview
2. Area Description
3. Props Description
    - 3.1 Tag marker
    - 3.2 Shelves & Pallets
    - 3.3 Blue Backing Board
    - 3.4 Trash Can
    - 3.5 Color Blocks

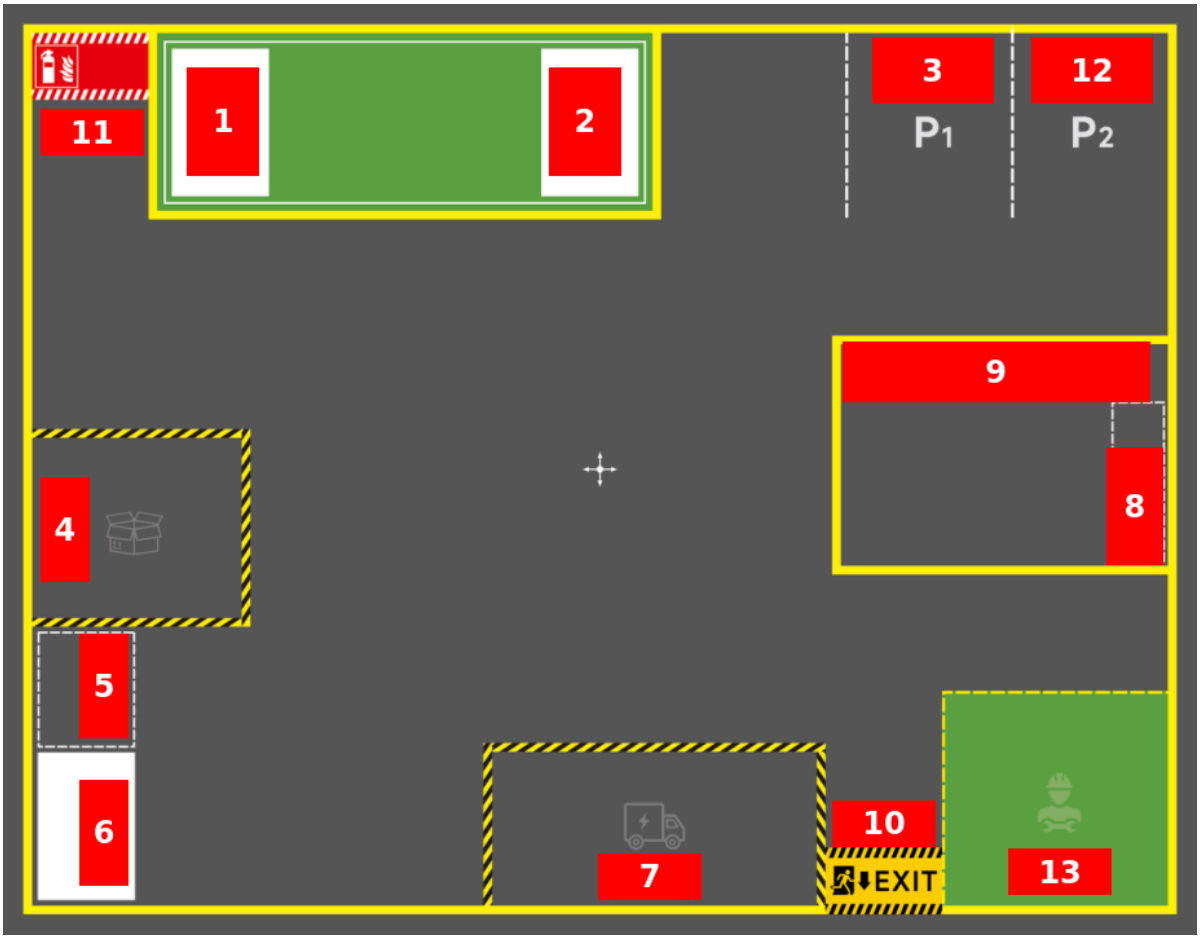

1. Map Overview

2. Area Description

- Area naming is arbitrary and **can be defined by yourself according to actual needs**. The following area naming and placement are for reference only.
- 1, 2, 6: Shelf area (place shelves & pallets)
- 3: Parking lot No. 1
- 12: Parking lot No. 2
- 4: Goods warehouse (place blue backing boards and color blocks)

- 5: Goods sorting area (place blue backing boards and color blocks)
- 7: Shipping area
- 8: Waste sorting area (place waste blocks)
- 9: Trash can area (place trash cans)
- 10: Exit
- 11: Firefighting equipment area
- 13: Equipment maintenance area

3. Props Description

3.1 Tag marker

- Used for the visual relocalization enhancement function to correct positioning errors caused by various reasons and improve the robustness of the robot's global localization.

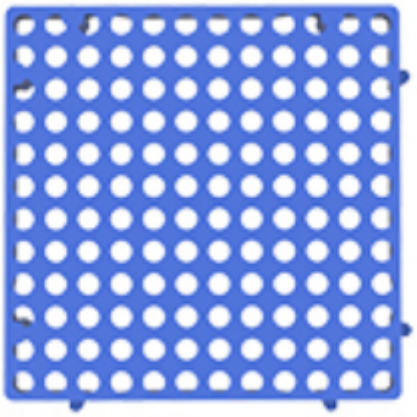

3.2 Shelves & Pallets

- Used to place goods blocks, simulating warehouse shelves.

3.3 Blue Backing Board

- Used to simulate the goods backing boards in a real warehouse.

3.4 Trash Can

- Used for waste sorting tasks; the robot sorts the waste into the corresponding trash can.

3.5 Color Blocks

- Used to simulate goods of various colors; can be used for robotic arm grasping tasks such as goods sorting and goods transport.
